DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

UNOCCUPIED

This house was temporarily ~~occupied~~ at the time of survey. It is worth mentioning as another example of the common 2 bay by 1 bay frame house so prevalent in this late 19th century community.

The house has been totally redone with aluminum siding on the exterior and remodeled inside. The house varies slightly with a single story shed addition off the west (back) side. A 20th century porch with block foundation is found on the east (main) facade. A few 6/6 sash remain but modern ones have replaced any early windows. The house has exterior 20th century stretcher bond brick stack on the north gable end.

SPECIFIC DATES

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

This house, like most of the others in Pilot Town, hasn't much significance by itself but with the others form the late 19th Century community.

Pilot Town

CE- 840, 842, 843, 844, 845 (log house), 846, 847 (school no. 3), 848, 849 (store), 850, 851, 852, 853 (Johnson Victorian), 854, 855, 856, 857, 858, 859, 860, 861, 862, 863.

Pilot Town owes its existence to two primary reasons. The first is the 19th Century mining activity in the area and the second is the shift of the Susquehanna crossing from the Bald Friar ferry to the town of Conowingo. The road from Pennsylvania to the Bald Friar ferry passed west of the present Pilot Town crossroads. It is obvious that this route predated any other southerly route in the vicinity especially since the earlier farms and houses are oriented to it. St. Patrick's Church (CE-834), Pembroke Farm (CE-836), Moore-Love log house (CE-845), and the Fulton-Alexander House (CE-841) all date from before the mid 19th Century and stand near or next to the earlier route. Due to the treacherous descent to the ferry and easier access at Conowingo a covered bridge was built across the Susquehanna at Conowingo, which eclipsed activity at Bald Friar. With the construction of a bridge at Conowingo a more direct southerly route from Pennsylvania was needed, which necessitated an easterly shift in travel. It amounted to a difference of a few hundred yards but was enough to form an intersection with the east/west Mount Pleasant road. Continued interest in the mining of feldspar, soapstone, and gravel in the mid 19th Century brought more development and change. Pilot Town was a definite result of these two factors and the mid to late 19th Century housing that exists today is ample evidence for this occurrence. Pilot Town supported a local market till the early 20th Century (CE-849) and its own school (CE-847) till about the same time.

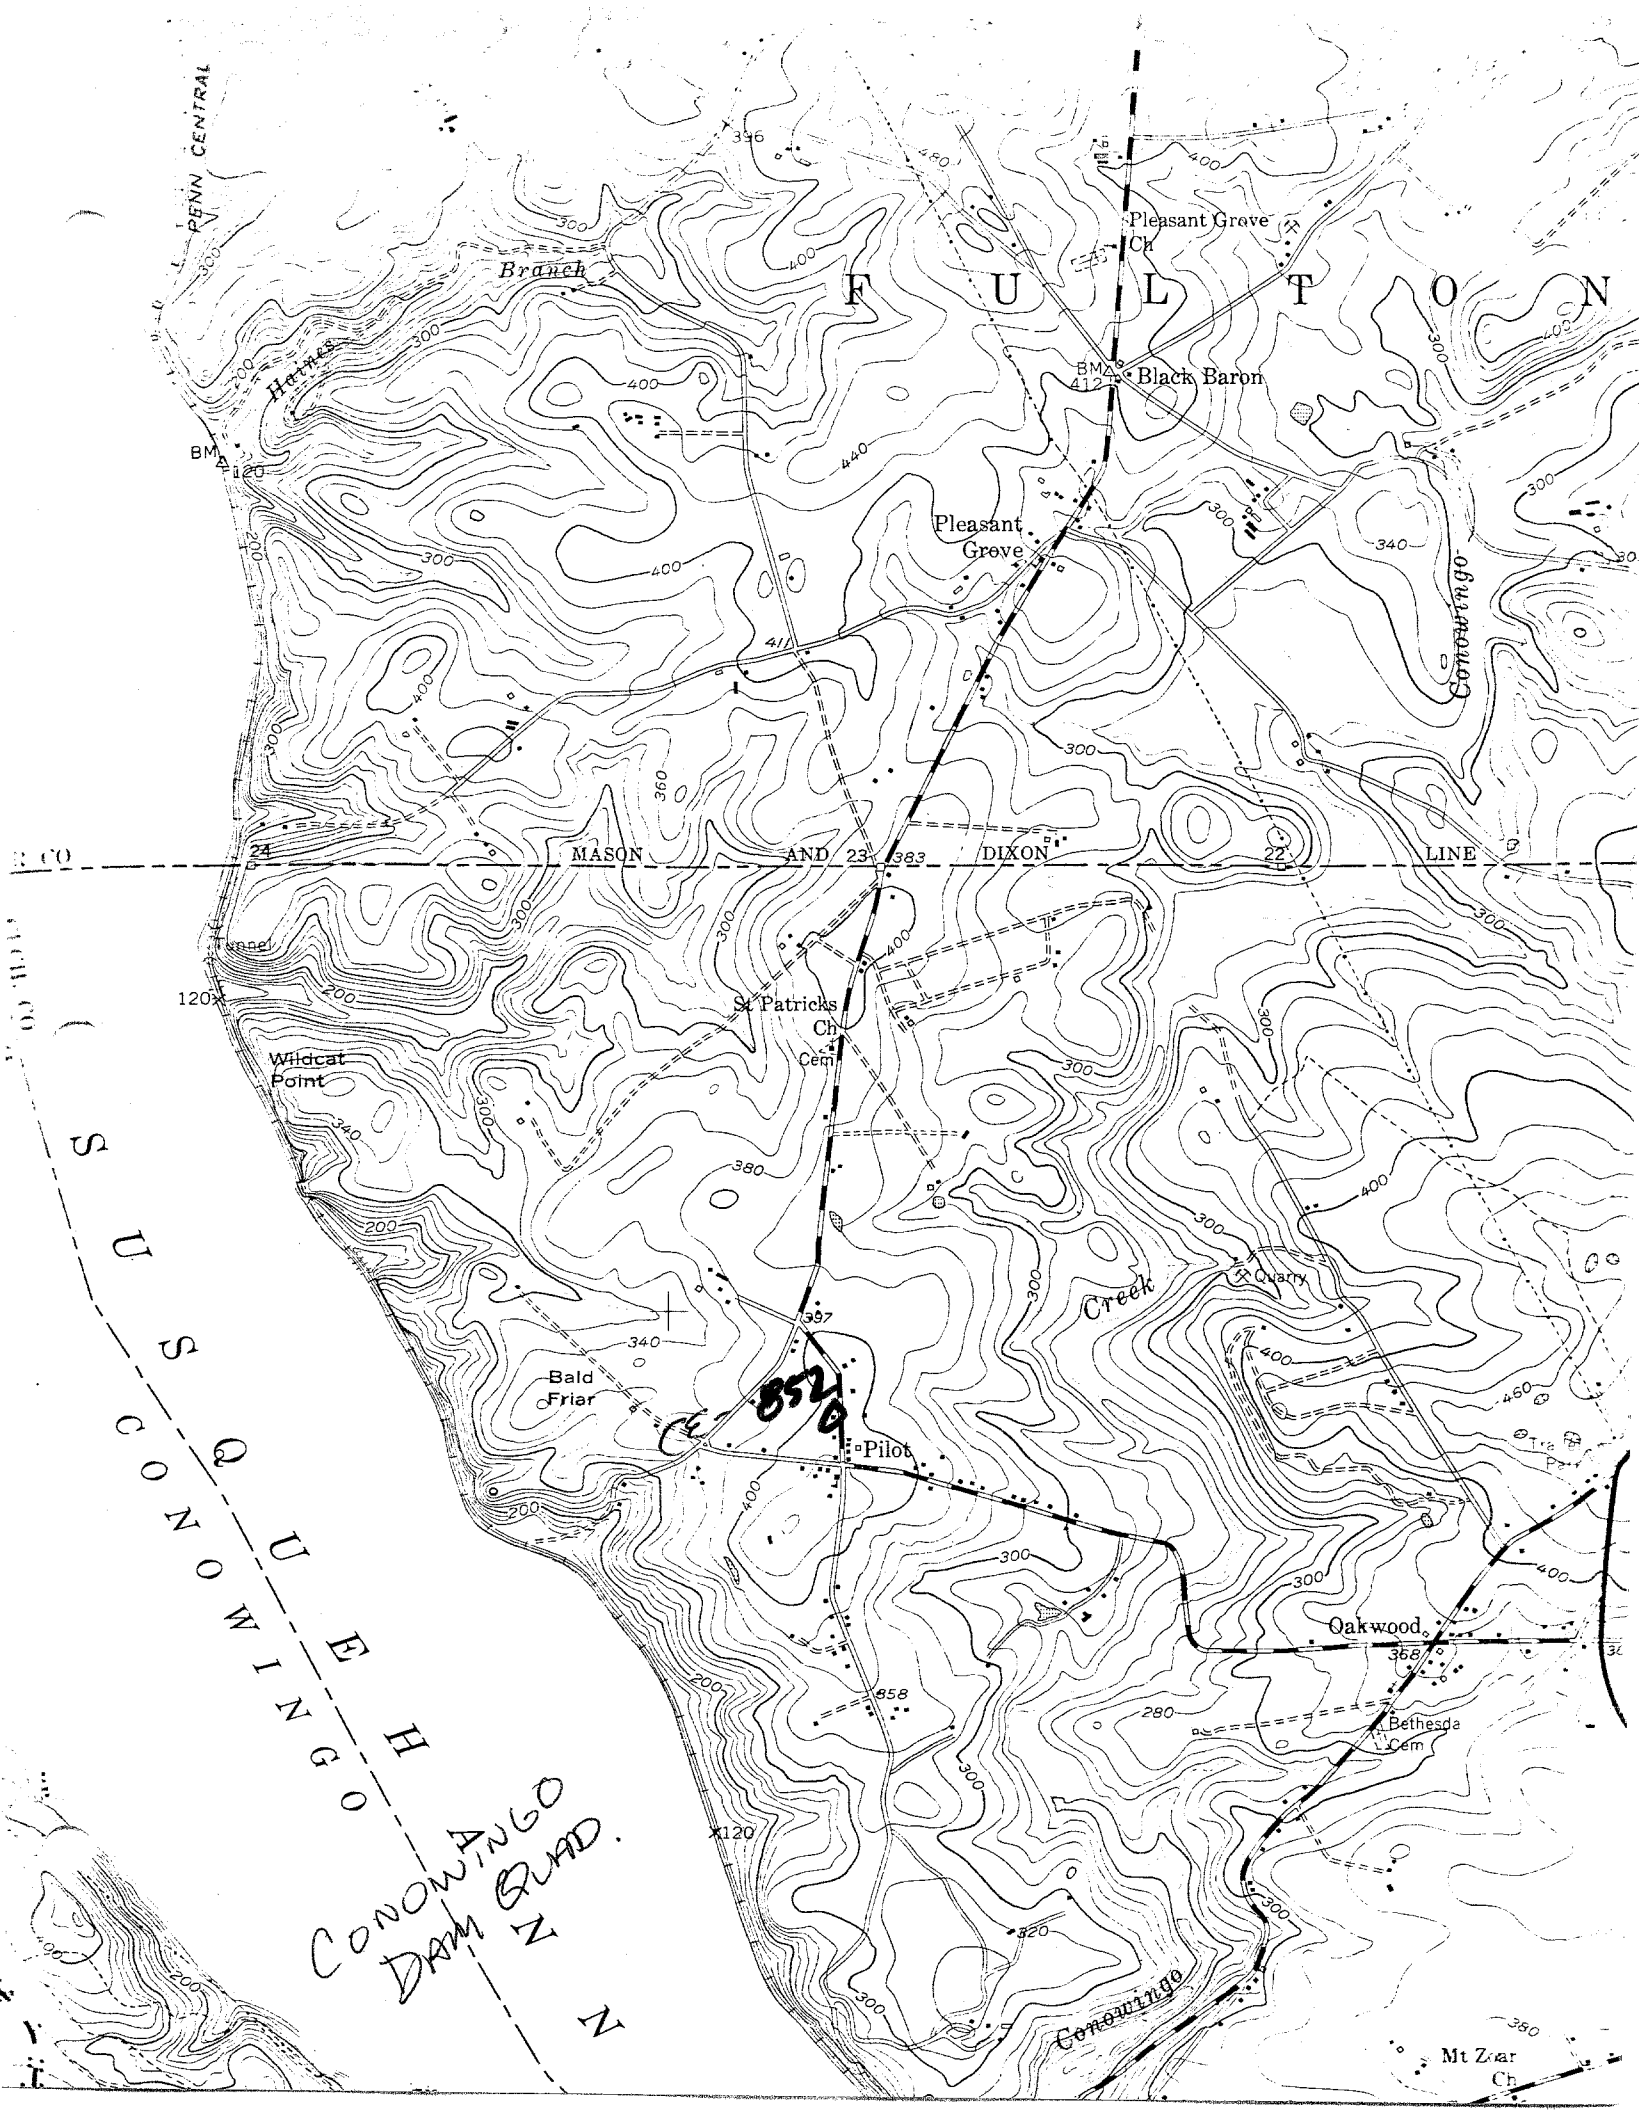

The houses that make up Pilot Town are traditional two^{story}/frame structures that one sees throughout Cecil County. (see CE-840, CE-842, CE-844, CE-846,

Pilot Town

2

CE-848, CE-851, CE-852, CE-853, CE-854, CE-855, CE-856, CE-857, CE-858, CE-859, CE-860, CE-861, CE-862, CE-863) The structures are basically

plain straightforward buildings that are typical houses for workers in a mining area. This is not to say that the previous agricultural life of area was replaced by the mines. The farming community continued as it had since the late 18th Century but now alongside mining operations that brought Irish immigrants in the early 19th Century.
